ETHOS GOLD CORP.

Notes to the Condensed Interim Financial Statements For the Three Months Ended March 31, 2017 and 2016 (Expressed in Canadian Dollars) (Unaudited)

1. NATURE OF OPERATIONS

Ethos Gold Corp. (the “Company” or “Ethos”) was incorporated on March 12, 2007 under the British Columbia Business Corporations Act. In 2009, it began trading on the TSX Venture Exchange (“TSX-V”) as a Tier 2 company under the symbol ECC. Its registered office is located at 1430 – 800 West Pender Street, Vancouver, BC, V6C 2V6. The Company’s principal business activities are the identification, exploration and development of economically viable mineral properties.

The Company’s operations during the three months ended March 31, 2017 were solely directed towards the search for business opportunities in favorable jurisdictions.

These financial statements have been prepared on the basis that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. The ability of the Company to continue as a going concern is dependent on obtaining additional financing and if required through the issuance of debt or equity. There is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These financial statements do not reflect the adjustments or reclassifications that would be necessary if the Company were unable to continue operations in the normal course of business.

2. BASIS OF PREPARATION

Statement of compliance

These condensed interim financial statements, including the comparative statements, have been prepared in accordance with International Accounting Standards (“IAS”) 34, Interim Financial Reporting using the same accounting policies and methods as were used for the Company’s financial statements and the notes thereto for the year ended December 31, 2016 (“Annual Financial Statements”). These financial statements should be read in conjunction with the Annual Financial Statements.

Basis of Preparation

These financial statements have been prepared on a historical cost basis, except for cash and cash equivalents classified as fair value through profit or loss which has been measured at fair value.

Changes in accounting standards not yet adopted

IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple classification options in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial impairment methods in IAS 39. The effective date for application of IFRS 9 was revised from annual periods beginning on or after January 1, 2015, to annual periods beginning on or after January 1, 2018, with earlier adoption permitted. The Company is currently evaluating the impact of the adoption of the amendments on its financial statements; however, the impact, if any, is not expected to be significant.

The Plan provides that the directors of the Company may grant options to purchase common shares on terms that the directors may determine. 8. COMMITMENT AND CONTINGENCIES

The Company's exploration activities in the Yukon Territory are subject to various federal, provincial and state laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company conducts its operations so as to protect public health and the environment, and believes its operations are materially in compliance with all applicable laws and regulations. The Company makes, and expects to make in the future, expenditures to comply with such laws and regulations, including any reclamation at its mineral properties, on a continuous basis.

9. MANAGEMENT OF CAPITAL

The Company's objectives when managing capital are to safeguard its ability to pursue its objectives. The Company measures its capital as its shareholders' equity. The Company's primary source of capital is the issuance of equity.

The Company manages and adjusts its capital structure whenever changes in economic conditions occur. To maintain or adjust the capital structure, the Company may seek additional funding.

The Company may require additional funding to meet its administrative overhead expenses in the long term. The Company believes it will be able to raise capital as required, but recognizes there will be risks involved that may be beyond its control.

The Company expects its current capital resources will be sufficient to carry out its exploration plans and operations through at least the next twelve months. There are no external restrictions on the Company's capital.

10. FINANCIAL INSTRUMENTS

The Company is exposed to credit risk, liquidity risk and interest rate risk from its financial instruments which include cash and cash equivalents, amounts receivable, accounts payable and accrued liabilities. The Company is not exposed to significant market or other price risks.

Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's cash and short term investments are on deposit at a major financial institution. Amounts receivable consist primarily of goods and services tax refunds due from the Government of Canada and are neither past due nor impaired. As such, the Company considers its exposure to credit risk to be minimal.

Liquidity risk

Liquidity risk is the risk that the Company will be unable to meet its financial obligations as they come due. The Company is exposed to liquidity risk through its accounts payable, accrued liabilities and amounts due to related parties, which are all due on demand. The Company uses cash forecasts to ensure as far as possible that there is sufficient cash on hand to meet short-term business requirements. Cash is invested in highly liquid investments which are available to discharge obligations when they come due.

10. FINANCIAL INSTRUMENTS (continued)

Interest rate risk

Interest rate risk is the risk that changes in interest rates will affect the fair value or future cash flows of the Company's financial instruments. The Company is exposed from time to time to interest rate risk as a result of holding fixed rate temporary investments of varying maturities. The Company reduces the risk that it will realize a loss as a result of a decline in the fair value of these investments by limiting these investments to highly liquid securities with short-term maturities.

As at March 31, 2017, the Company estimates that a 1% change in prevailing interest rates would change the fair value of future cash flows from the Company's financial instruments by approximately \$1,000 (December 31, 2016 - \$1,000).
